

Entering the labour  
market and how to be  
of use at it

# Basic topics:

- education -a factor for selecting the occupation (is university a necessity for a high pay?,high pays in different jobs, good qualification or enjoyment?)
- branches at our school
- job offer for our graduates/school leavers
- problems with unemployment, reasons ???
- What is it LOGISTICS? Why are logisticians in demand today?

# Other topics:

- summer jobs for students (preparing for a job)
- jobs in foreign owner companies
- jobs abroad (EU, other countries)
- discrimination (of women, men, races, because of sexual orientation,...) ???
- employment of foreigners in the CR

# Education

- Basic e. - the choice of good work is very narrow, it may be degrading work but these people may be good business
- Secondary e. - graduates have an open door and into jobs where they can exceed the salary engineering salary
- Higher e. - they can afford to choose their jobs but also sometimes required to submit to the less well educated (architect craftsmen)
- In the Czech Republic people can work from 16 years and to operate a business Activities of 18 years. People can take a concession on the basis of trades or reporting trades, which are craft, bound, free.

# Branches at our school
